| anuraggaur29.netlify.app
Chandigarh, India

Summary

Full-stack developer who shipped three production web apps (React/FastAPI/PostgreSQL) on real URLs. Owns features end-to-end: schema design, API, RLS/auth, and deployment. Looking for a SDE/full-stack role at higher scale.

Education

Chandigarh University

B.E. Computer Science Engineering (AI & ML Specialization) — CGPA: 8.16

Mohali, Punjab

Aug 2023 – Jan 2027

Hari Bhoomi Sr. Sec. School

Class XII — 84%

Jind, Haryana

2023

Experience

Full Stack Web Development Intern (Remote)

Web Stack Academy (MERN Stack)

Mar 2026 – Apr 2026

2 Months

- Built **5+ responsive web apps** using **React.js, Node.js, Express.js, MongoDB**; developed **10+ RESTful API endpoints** with CRUD operations, authentication, and database integration.
- Completed **15+ hands-on assignments** following software development best practices; used **Git/GitHub** for version control across all projects.

Projects

ScolAR — AI-Powered Exam Preparation Platform (React 19, FastAPI, PostgreSQL, Supabase) — [Live](#) | [GitHub](#) 2026

- Full-stack exam prep platform with **15 API endpoints** serving **100+ active students** at Chandigarh University; **10-table PostgreSQL** schema with **20+ RLS policies** ensuring per-student data isolation; dashboard queries return in **~150ms** via Supabase PostgREST.
- Automated CUIMS data sync via a **2,200-line async scraper** (Playwright + httpx + OCR captcha solver) extracting **150+ data points per student** (profile, attendance, marks, datesheet, timetable, syllabus, results) in **~12s**, replacing **~3 hrs/week** of manual copy-paste.
- Integrated **Razorpay** payments (HMAC-SHA256 signature verification) and admin dashboard with RBAC via **SECURITY DEFINER** helper functions.
- AI chat with multi-provider failover across **9 LLMs / 5 platforms** (Mistral, Groq, Gemini, OpenRouter, Cerebras), daily quota enforcement, and **pg-cron** auto-purge every 24h.

StockPulse — Retail Inventory Analytics Platform (React, FastAPI, PostgreSQL, Material UI) — [Live](#) | [GitHub](#) 2026

- Inventory analytics over **3,700+ products** using **CTEs, window functions** (RANK, LAG), **materialized views**, and **triggers** to compute stock trends and reorder signals in real time.
- JWT-based RBAC** so managers and staff see role-appropriate views; materialized views pre-aggregate category metrics, keeping **page loads under 800ms** with analytical queries completing in **~150ms**.

LectureCapture AI — AI-Powered Study Sheet Generator (React, FastAPI, Mistral AI, Material UI) — [Live](#) | [GitHub](#) 2026

- Pipeline converting uploaded video/audio/PDF lectures into structured study sheets via a provider-abstracted **LLM** layer; 45-min lecture processed end-to-end in **~25s** including transcription and summarization.
- Output as structured **Markdown** with formula blocks and key-concept highlights; **PDF export** with styled formatting; CI/CD via Vercel.

Technical Skills

Languages: C, C++, Python, JavaScript, TypeScript, SQL

Frontend: React, Next.js, Tailwind CSS, Material UI, Recharts

Backend: FastAPI, Node.js, Express, REST APIs, JWT Auth, Razorpay Integration

Databases: PostgreSQL, Supabase, MongoDB — schema design, query optimization, RLS, materialized views

Tools & DevOps: Git, GitHub, Postman, Docker, Linux, Selenium, Playwright, Vercel, Render

Achievements & Certifications

Top 50 of 10,000+ teams, Graph-E-Thon 3.0 National Hackathon (2026).

Class Representative for 70+ students — primary faculty-student liaison for 1.5+ years.

Microsoft Azure AI Fundamentals (AI-900) — Azure Cognitive Services & core AI/ML concepts.
